

# Action Taken

- CALS was a cosponsor of a visit from Professor Barry S. Stein from Tennessee Technological University. Professor Stein led a two-day Critical Thinking Symposium on the ISU campus.
- The report and recommendations were discussed by a joint meeting of the Curriculum Committee and the Student Outcomes Assessment Committee.
- The result of those discussions is that the Curriculum Committee will sponsor faculty development activities to assist CALS faculty in incorporating and assessing critical thinking/problem solving activities in CALS courses mapped to this learning outcome.
